

Hopscotch

Players: 1+

What you need:

- chalk or masking tape
- an object each, like a pebble or bean bag

Rules

- The first player stands behind the starting line to throw their marker in square one.
- Hop over square one to square two and then continue hopping to square ten, turn around, and hop back again.
- Stop in square two to pick up the marker, hop in square one, and out.
- The next player then takes their turn.
- Keep going by throwing the stone into the next square (square two).
- Hopping is done on one foot where there is one square and two feet where squares are side-by-side. If an object is in one of these side-by-side squares, the player must hop on one foot to avoid the object.
- A player must always hop over any square where a marker has been placed.
