

Keep Swimming

I can use number bonds to 10 to make 100.

Use the number bonds to 10 to help you work out number bonds to make 100. (see separate sheet for part-whole models)

Fill in the missing numbers.

$$1 + 9 = 10 \quad \text{so} \quad 10 + \boxed{} = 100$$

$$2 + \boxed{} = 10 \quad \text{so} \quad 20 + \boxed{} = 100$$

$$10 - 3 = 7 \quad \text{so} \quad 100 - \boxed{} = \boxed{}$$

Tom has 30 yellow cars and 70 black cars.
How many cars does Tom have altogether?

Ann has 100 flags and sells 50.
How many flags does she have left?

Go Deeper

I can use number bonds to 10 to make 100.

Copy and continue the pattern.

$$0 + 10 = 10 \quad \text{so} \quad 0 + 100 = 100$$

$$1 + 9 = 10 \quad \text{so} \quad 10 + 90 = 100$$

Fill in the missing numbers.

$$10 - 9 = 1 \quad \text{so} \quad 100 - \boxed{} = 10$$

$$10 - 3 = 7 \quad \text{so} \quad 100 - \boxed{} = \boxed{}$$

$$10 - 6 = \boxed{} \quad \text{so} \quad 100 - \boxed{} = \boxed{}$$

Dan has 20 red cars.
How many more cars does he need to get 100.

Explain your answer.
