

Keep Swimming

I know addition and subtraction facts for 6.

Fill in the missing numbers to show the different ways you can partition 6. Work systematically.

Fill in the missing numbers.

$$6 = 0 + \square$$

$$6 = \square + 3$$

$$6 = 1 + \square$$

$$6 = \square + 4$$

Fill in the missing numbers.

$$6 - 2 = \square$$

$$6 - 5 = \square$$

$$6 - \square = 0$$

$$6 - \square = 6$$

Go Deeper

I know addition and subtraction facts for 6.

Draw the part-whole models to show the number bonds to make 6. Work systematically. The first one has been started for you.

Fill in the missing numbers.

$$6 = 0 + \square$$

$$6 = \square + 3$$

$$6 = 1 + \square$$

$$6 = \square + 4$$

Fill in the missing numbers.

$$6 - 2 = \square$$

$$6 - 5 = \square$$

$$6 - \square = 0$$

$$6 - \square = 6$$

Circle the odd one out.

$$6 - 0$$

$$1 + 5$$

$$3 + 3$$

$$2 + 3$$

$$6 - 1$$

Why is it the odd one out?
